Assignment 2

Instructor: Jumanah Al Asadi

NETFLIX CLONE

For this Assignment, I decided to do a netflix clone. I chose Two pages (the Homepage and the list page) . I chose this website, because I typically enjoy using netflix and i felt like it would be fun to do.

COMPONENTS

For my components, i had 5:

- Navigation
- Footer
- Banner- for the main homepage Banner
- Shelf - for the rows of movie options
- Buttons

PAGES

I had my general two pages which were my homepage which imported the banner and shelf; and the myListPage which imported the shelf

MY APP.JS

For my app.js, i created the two routes to my two pages and also included the nav and footer so they would be present on all pages
